Semester :- 8th**

**UNDER THE GUIDANCE OF:
HARSH MEHTA
Computer Department
BHGCET Rajkot**

Company Address

- **FICE Education Pvt. Ltd.**
A-11-1105, Unitech Arcadia,
South City-2, Gurugram – 122018, India

Company Brief Introduction

- FICE Education Pvt. Ltd. is an education and training organization that provides **industry-oriented skill development programs** in collaboration with reputed technology partners such as Microsoft.
- The company focuses on delivering **online and virtual training programs** in the domains of **Data Analytics, Artificial Intelligence, Cloud Computing, and Business Intelligence**.

FICE Education plays a vital role in bridging the gap between academic learning and industry requirements by offering structured internships, certification-oriented learning, and expert-led sessions.

- As the internship was conducted in **virtual mode**, the company follows a **digital operational structure**.
- **Company Layout Includes:**
 - Online training infrastructure
 - Learning Management Systems (LMS)
 - Virtual classrooms (Zoom)
 - Telegram & communication platforms
 - Digital assessment and certification systems
 - This virtual layout enables students across different locations to participate effectively.

12 week work plan

Week-wise Internship Work Plan

- **Week 1:** Orientation & Introduction to AI and Data Analytics
- **Week 2:** Data Handling, Data Cleaning, Data Visualization & EDA
- **Week 3:** Power BI & Data Modeling, DAX
- **Week 4:** Deep Learning & Artificial Neural Networks (ANN)
- **Week 5:** Advanced DAX & Power BI Dashboard Development
- **Week 6:** Machine Learning & Supervised Learning
- **Week 7:** Unsupervised Learning & Reinforcement Learning
- **Week 8:** Deep Learning & ANN (Advanced Concepts)
- **Week 9:** CNN, TensorFlow & Keras
- **Week 10:** Generative AI & Microsoft Copilot
- **Week 11:** Cloud Computing Fundamentals & Azure Introduction
- **Week 12:** Azure Experiments & Final AMA Session

12 week work plan (Gantt Chart)

12 Week Industrial Internship Work Plan

Work Plan Time Table

B.H.Gardi College of Engineering and Technology

Smt. T.V.Mehta Charitable Foundation

12 week work plan (Time Table)

Week	Date	Day		Timings	Topic Covered	Trainers
0	21st Jan 2026	Wednesday	04 pm to 07 pm		Registration & Orientation	Program Team & Aman
1	21st Jan 2026	Wednesday			Introduction to AI	Aman
	23rd Jan 2026	Friday			Introduction to DA	Aman
	28th Jan 2026	Wednesday			AMA Session	Program Team
	30th Jan 2026	Friday			Data Handling & Data Cleaning	Sejal/ Vignesh
2	2nd Feb 2026	Monday	10 AM-12 PM	1 PM-3 PM	Data Vizulization & EDA	Sejal/ Vignesh
	4th Feb 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Power BI & Data Modeling	Sejal/ Vignesh
	6th Feb 2026	Friday	10 AM-12 PM	1 PM-3 PM	DAX	Sejal/ Vignesh
3	9th Feb 2026	Monday	10 AM-12 PM	1 PM-3 PM	Visulizations	Sejal/ Vignesh
	11th Feb 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Interactivity	Sejal/ Vignesh
	13th Feb 2026	Friday	10 AM-12 PM	1 PM-3 PM	Advanced DAX	Sejal/ Vignesh
4	16th Feb 2026	Monday	10 AM-12 PM	1 PM-3 PM	Power BI Dashboard	Sejal/ Vignesh
	18th Feb 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Machine Learning	Aman / Thoufiq
	20th Feb 2026	Friday	10 AM-12 PM	1 PM-3 PM	Supervised Learning	Aman / Thoufiq
5	23rd Feb 2026	Monday	10 AM-12 PM	1 PM-3 PM	Un supervised Learning	Aman / Thoufiq
	25th Feb 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Reinforment Learning	Aman / Thoufiq
	27th Feb 2026	Friday	10 AM-12 PM	1 PM-3 PM	Deep Learning	Aman / Thoufiq
6	2nd Mar 2026	Monday	10 AM-12 PM	1 PM-3 PM	ANN	Aman / Thoufiq
	4th Mar 2026(Holiday)	Wednesday	10 AM-12 PM	1 PM-3 PM	Holiday	
	6th Mar 2026	Friday	10 AM-12 PM	1 PM-3 PM	CNN	Aman / Thoufiq
7	9th Mar 2026	Monday	10 AM-12 PM	1 PM-3 PM	Tensor Flow & Keras	Aman / Thoufiq
	11th Mar 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Gen AI	Aman / Thoufiq
	13th Mar 2026	Friday	10 AM-12 PM	1 PM-3 PM	Co pilot	Aman / Thoufiq
8	16th Mar 2026	Monday	10 AM-12 PM	1 PM-3 PM	Cloud Computing Fundamentals	Shelar/ Dristi
	18th Mar 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Azure Introduction	Shelar/ Dristi
	20th Mar 2026	Friday	10 AM-12 PM	1 PM-3 PM	Azure Experiments	Shelar/ Dristi
9	23rd Mar 2026	Monday	10 AM-12 PM	1 PM-3 PM	Azure Experiments	Shelar/ Dristi
	25th Mar 2026	Wednesday	10 AM-12 PM	1 PM-3 PM	Project Submission	Shelar/ Dristi
	27th Mar 2026	Friday	10 AM-12 PM	1 PM-3 PM	Azure Experiments	Shelar/ Dristi
10	30th Mar 2026	Monday	10 AM-12 PM	1 PM-3 PM	Project Submission	Shelar/ Dristi

What is work execution?

What is Work Execution?

- Work execution refers to the **practical implementation of planned activities** during the internship period.
- In this internship, work execution included:
 - Attending live online sessions
 - Understanding theoretical concepts
 - Observing demonstrations of tools and technologies
 - Performing guided practical exercises
 - Attempting assessments after each module
- The execution was carried out in accordance with the internship schedule and guidelines.

List of Skill imparted

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

During the internship, the following skills were developed:

- **Technical Skills**

1. Data Analytics fundamentals
2. Business Intelligence concepts
3. Power BI basics and dashboards
4. Artificial Intelligence & Machine Learning concepts
5. Cloud Computing fundamentals (Microsoft Azure)

- **Professional Skills**

1. Analytical thinking
2. Problem-solving ability
3. Time management
4. Technical communication
5. Industry readiness

STRENGTHS DEVELOPED DURING TRAINING

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

- Improved understanding of real-world technologies
- Ability to analyze and interpret data
- Exposure to industry-standard tools
- Enhanced confidence in technical subjects
- Better understanding of career opportunities in Data, AI & Cloud

This module focused on understanding **Business Intelligence (BI)** concepts using **Microsoft Power BI**. The training covered the complete process of transforming raw data into meaningful insights for business decision-making.

Key learning areas included:

- Introduction to Business Intelligence and data analytics
- Connecting Power BI to multiple data sources
- Data cleaning and transformation using Power Query
- Data modeling and relationship creation
- Creating interactive reports and dashboards
- This module enhanced the understanding of how organizations use data visualization to analyze business performance.

This module introduced **cloud computing concepts** using the **Microsoft Azure platform**.

It provided a foundational understanding of cloud services and their role in modern IT infrastructure.

Topics covered:

- Basics of cloud computing
- Azure global infrastructure
- Cloud service models (**IaaS, PaaS, SaaS**)
- Azure subscriptions and resource groups
- Introduction to virtual machines and storage

This module helped in understanding how cloud platforms support scalability, security, and cost-effective computing.

This module focused on the **administration and management of cloud resources**.

It emphasized the operational aspects of maintaining cloud environments.

Key concepts included:

- Cloud resource management
- Virtual networking and access control
- Identity and access management
- Monitoring and performance management
- Backup and disaster recovery concepts

The module provided insight into how cloud administrators ensure reliability, security, and efficiency of cloud systems.

This module introduced **Artificial Intelligence (AI)** and **Machine Learning (ML)** fundamentals and their real-world applications.

Topics covered:

- Introduction to Artificial Intelligence
- Machine Learning concepts
- Supervised and Unsupervised learning
- Deep Learning and Artificial Neural Networks (ANN)
- Applications of AI in healthcare, finance, and education

This module helped in understanding how intelligent systems learn from data and make predictions or decisions.

This module focused on **Generative AI** and the use of **Microsoft Copilot** as an AI-powered productivity assistant.

Key learning areas included:

- Introduction to Generative AI
- Role of AI in automation and productivity
- Microsoft Copilot features and applications
- Ethical considerations in AI usage
- AI-assisted content creation and data summarization

This module demonstrated how AI tools can enhance efficiency and decision-making in professional environments.

Week 1 — Introduction to AI & Data Analysis

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

- Learned fundamentals of Artificial Intelligence.
- Introduction to Data Analytics lifecycle.
- Understanding structured and unstructured data.
- Overview of Business Intelligence tools.
- Installation and setup of Power BI Desktop.
- Basic dataset loading and visualization creation.

Concepts Learned

- AI vs Machine Learning
- Role of data in decision-making
- Data-driven organizations

Types of analytics:

- Descriptive
- Diagnostic
- Predictive
- Prescriptive

Week 2 — Advanced ETL Workflows & Data Transformation

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

This week focused on **ETL (Extract, Transform, Load)** processes using Power Query Editor.

- Connected datasets from Excel and CSV files.
- Cleaned inconsistent datasets.
- Removed duplicate records.
- Handled missing values.
- Changed column data types.
- Performed Pivot and Unpivot operations.
- Combined datasets using Merge & Append queries.
- Performed Exploratory Data Analysis (EDA).

Skills Developed

- Data cleaning techniques
- Query transformation logic
- Data profiling
- Data normalization

Work Done

Focused on building efficient data models.

- Learned Star Schema architecture.
- Created Fact and Dimension tables.
- Established relationships between tables.
- Configured cardinality and filtering.

DAX Learning

- Calculated Columns vs Measures
- SUM(), AVERAGE(), COUNTROWS()
- Filter Context & Row Context

Dashboard Interactivity

- Added slicers for filtering.
- Implemented bookmarks.
- Created tooltips and navigation panels.

Week 4 — Business Intelligence Dashboards & Visualization

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

Designed professional dashboards.

Dashboard Projects Created

COVID-19 Analytics

Dashboard

- Active Cases KPI
- Death Count Visualization
- Discharged Patients Analysis
- State-wise filtering
- Population vs Cases comparison charts

Week 4 — Business Intelligence Dashboards & Visualization

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

Designed professional dashboards.

Dashboard Projects Created

Population Analysis Dashboard

- Pie chart for population distribution.
- Bar charts comparing states.
- Trend-based insights.

Work Done

Designed professional dashboards.

Dashboard Projects Created

Entertainment Dataset Dashboard (Netflix Style)

- Genre-based filtering.
- Movie vs TV Show comparison.
- Interactive slicers.
- User-controlled dashboard navigation.

Work Done

Transitioned from analytics to Machine Learning concepts.

- Introduction to ML Pipeline.
- Understanding supervised learning.
- Dataset splitting:
 - Training Set
 - Validation Set
 - Testing Set

ML Concepts Covered

- Regression (numeric prediction)
- Classification (category prediction)
- Model generalization
- Feature scaling (theory)

Work Done

- Deep Learning fundamentals.
- Architecture of Artificial Neural Networks (ANN).
- Identify patterns in complex data.
- Analyzed real-world AI applications in healthcare, finance, and education.

Concepts Learned

- Input, Hidden, and Output.
- The role of weights, biases, and activation functions.
- shallow learning and deep neural pipelines.

Week 7 — Computer Vision (CNN) & Generative AI

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

- data processing and generative systems.
- Convolutional Neural Networks (CNN).
- The role of Generative AI in modern automation.

vision-based architecture components:

- Convolutional layers
- Pooling layers
- Padding techniques for data retention
- Large Language Models (LLMs).

Concepts Learned

- Computer vision fundamentals.
- Ethical considerations in Generative AI usage.
- AI-assisted content creation and data summarization.

Week 8 — Microsoft Copilot & Cloud Fundamentals

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

- Transitioned to productivity tools and global cloud infrastructure.
- Microsoft Copilot as an AI assistant.
- Cloud computing and the Microsoft Azure.
- Azure global infrastructure and data center concepts.

Cloud Service Models:

- Infrastructure as a Service (IaaS)
- Platform as a Service (PaaS)
- Software as a Service (SaaS)

Concepts Learned

- Roles of AI in professional automation and productivity.
- Azure subscriptions and resource group organizations.
- Benefits of cloud scalability, security, and cost-efficiency.

Microsoft Copilot for Microsoft 365 architecture simplified

Week 9 — Azure Experiments & Administration

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

- Administration and management of cloud resources.
- Practical labs for deploying and managing virtual machines (VMs).
- Configured virtual networking and access control protocols.
- Implemented identity and access management (IAM) strategies.

Administration Areas:

- Cloud resource management
- Performance monitoring
- Resource security and auditing

Concepts Learned

- Principles of secure and efficient cloud operations.
- Virtual network isolation and connectivity management.
- Strategies for cost-effective computing in the cloud.

Week 10 — Advanced Operations & Milestone Completion

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

Work Done

- Completed advanced technical labs and finalized program requirements.
- Conducted advanced Azure experiments with SQL databases.
- Explored backup and disaster recovery frameworks.

Project & Review Highlights:

- Final technical skill verification
- Review of industry readiness goals
- Summarized learning outcomes across Data, AI, and Cloud modules.

Concepts Learned

- Maintaining business continuity through cloud-based disaster recovery.
- Real-world application of cloud and AI technologies.
- Career opportunities in the modern Data and Cloud sectors.

Technical Skills Gained

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation

During the internship, proficiency was developed in the following technical domains:

- **Data Analytics & BI:** Mastery of ETL workflows, Power Query, and interactive Power BI dashboards.
- **Machine Learning:** Practical understanding of Supervised, Unsupervised, and Deep Learning pipelines.
- **Deep Learning Frameworks:** Hands-on experience with ANN, CNN, TensorFlow, and Keras.
- **Cloud Engineering:** Expertise in Microsoft Azure administration, virtual networking, and resource management.
- **Generative AI:** Advanced usage of Microsoft Copilot and prompt engineering for professional productivity.

**B.H.Gardi College of
Engineering and Technology**

Smt. T.V.Mehta Charitable Foundation
